

Conestoga-Rovers & Associates **Project Summary**

KEY PROJECT ELEMENTS

- **Due Diligence Assessment**
- **Environmental Liability Assessment**
- **Review of Regulatory Requirements**
- **Cost Estimating**

ENVIRONMENTAL LIABILITY VERIFICATION AND ENVIRONMENTAL RESERVE SUPPORT UNITED STATES

Since 1998, CRA has been working with a large automotive manufacturing company regarding establishing, and ongoing evaluation of, environmental liability reserves for more than 100 projects across the United States.

CRA initially conducted a due diligence review of the scope of work for each project and established a corresponding environmental reserve. Backup documentation was prepared for each project in accordance with regulatory and corporate requirements. The reserves are regularly reviewed and adjusted, as appropriate. The frequency of the reviews has been adjusted based on regulatory requirements. In addition, as regulations have changed, the form and substance of the reserve documentation has also been modified.

CRA continues to be involved with assisting this confidential client with their environmental liability reserve analysis activities.
