

Conestoga-Rovers & Associates Project Summary

KEY PROJECT ELEMENTS

- **Review of Client Operations**
- **Development of Training Courses and Instructor's Material**
- **Development of Multimedia Presentation Material**
- **Presentation of Training to Facility Staff**

LOCKOUT/TAGOUT TRAINING PROGRAM WORLD KITCHEN, LLC

CRA developed a comprehensive lockout/tagout training program solution for World Kitchen, LLC, a cooking and dinnerware products manufacturer and distributor.

The program included the development of both authorized and affected training courses and an instructor's manual. The courses were provided at four different manufacturing/warehousing facilities using a multimedia approach including lectures, guided discussions, videos, and hands-on exercises. The instructor's manual included an instructor's guide and lesson plan, power point presentation slides with instructor's notes, and student course materials and handouts.

A train-the-trainer program was also conducted using the instructor's manuals, including a module on adult learning.
