

# Conestoga-Rovers & Associates Project Summary

## KEY PROJECT ELEMENTS

- **NMP/CNMP Development**
- **Animal Waste Management Systems**
- **Feed Management**
- **Land Treatment Practices**
- **Nutrient Management**

## NMP/CNMP DEVELOPMENT VARIOUS LOCATIONS, UNITED STATES AND CANADA

CLIENT: VARIOUS CLIENTS  
DURATION: 2003 TO PRESENT

CRA has extensive experience in the preparation of Nutrient Management Plans (NMPs) and Comprehensive Nutrient Management Plans (CNMPs) throughout Canada and the U.S. This has given CRA unparalleled expertise in reviewing animal waste management systems and providing recommendations for modifications. To date, our staff has completed or is in the process of completing more than 230 NMPs and CNMPs for farms in Canada and in U.S. jurisdictions. This experience has given us a solid understanding of the various operations, techniques, altered or modified standards, and a unique approach to evaluating farms that sets us apart from the competition in this field. The work involved with NMP/CNMP development includes the collection and synthesis of data relevant to agricultural operations, including manure and wastewater storage and handling systems, feed management, land treatment practices, nutrient management, alternative utilization, and record keeping.
