

Conestoga-Rovers & Associates Project Summary

KEY PROJECT ELEMENTS

- **Strategic Oversight and Management of Numerous Studies**
- **Preparation of Draft and Final Environmental Impact Statements**
- **Development of Stormwater Pollution Prevention Plan**
- **Wetland Delineation**
- **Preparation of Environmental Impact Statements**

WIND FARM ENVIRONMENTAL ASSESSMENT NEW YORK

CLIENT: CONFIDENTIAL
DURATION: ONGOING

CRA has been retained by a confidential client to manage an application submission for the construction of a 99 MW wind farm spanning the Towns of Roxbury and Stamford, Delaware County, New York. The scope of work involves assistance with the permitting process through the State Environmental Quality Review (SEQR) process. The proposed wind farm will consist of approximately 33 Vestas V-90 3 MW wind turbines.

CRA is providing strategic advice on the content of the application and other SEQR documents. CRA is overseeing a team of consultants providing various elements to the required studies such as GIS mapping, noise studies, and avian/bat studies, while also serving as peer reviewers to ensure the elements of the studies meet the needs of both the client and the Towns.

CRA was retained by the client to manage and prepare the submission of the Draft Environmental Impact Statement (DEIS) for the wind farm. CRA was requested to prepare the DEIS in a six-week time frame, including execution of a wetland delineation required by the permitting agencies in accordance with the Army Corps of Engineers and New York State Department of Environmental Conservation protocols. The aggressive schedule was met by CRA, and the DEIS was accepted by the lead agencies reviewing the SEQR documentation.

CRA continues to provide oversight and strategic management services for the client as the project moves toward the completion of the SEQR phase, including the preparation of the Final Environmental Impact Statement, site-specific Stormwater Pollution Prevention Plans, and additional wetland assessment work as required.

This work is ongoing.
